Lecture 1. Modules and exportation and execution in Nodejs

07 April 2025   23:29

🧠 Key Syntax and Concepts to Remember

Concept	Syntax / Description
Function Definition	function name(params) { return result; }
Export Module	module.exports = { function1, function2 }
Import Module	const alias = require('./moduleFile')
Console Output	console.log('message', variable)
Package Script	"start": "node filename"
Run Script	npm start
Built-in vs Local Import	'fs' for built-in, './fileName' for local files
